

Proceedings of the
Fourth National Conference On
WIND ENGINEERING, NCWE - 2007
30th October to 1st November 2007

Promoted By
Building Materials Technology & Promotion Council, New Delhi

Jointly Organised by

Indian Society For
Wind Engineering

Structural Engineering
Research Centre

Contents

<i>List of Sponsors, Co-Sponsors & Supporters</i>	iii
<i>Preface</i>	v
<i>List of Committees</i>	vii
<i>Editors' Profile</i>	ix

KEY-NOTE LECTURES

Use of Satellite Images to Document Windstorm Damage: A Future Trend? <i>Kishor C. Mehta, J. Arn Womble and Daan Liang</i>	3
Recent Developments in the Specification of Wind Loads on Transmission Lines <i>John D. Holmes</i>	13
Role of Wind Engineering in Infrastructural Development of India – A Personal View <i>Prem Krishna</i>	27
Aerodynamic Load Models for Slender Structures in Time Domain <i>Partha P. Sarkar</i>	35
Adaptive FEM for Bridge Aerodynamics <i>R. Panneer Selvam, Sanjaya K. Patro and Harold Bosch</i>	49
Design Wind Loads for Arched Roofs <i>Michael Kasperski</i>	57
Some Considerations on the Specifications of the Indian Standard on Wind Loads IS: 875 (Part 3) 1987 <i>N. Lakshmanan, S. Arunachalam, S. Selvi Rajan and G. Ramesh Babu</i>	75

SESSION I

Boundary Layer Wind Tunnel Testing and Evaluation

A Consultant's Perspective on the Need for Wind Engineered High-Rise Buildings in India <i>K. Suresh Kumar</i>	87
Experimental Study on Tall Residential Towers at NWTF <i>Rajeev Gupta and K. Poddar</i>	95
Vehicular Exhaust Dispersion through Different Urban Category Atmospheric Boundary Layers <i>M.K. Krishna and R.M. Mahalingegowda</i>	105

Wind Tunnel Testing and Flow Visualization <i>V. Ramjee</i>	113
Distribution of Wind Pressure on a Tall Building with Varying Plan Shape <i>S.K. Dalui, A.K. Ahuja and V.K. Gupta</i>	119

SESSION II

Boundary Layer Wind Tunnel Testing and Evaluation

Wind Drag Factors for Low Solidity Wire Meshes for Parabolic Dish Antennas <i>Govind Swarup</i>	129
Effect of Boundary Wall on Wind Load on Roof Overhang <i>Alok David John and Ajay Gairola</i>	137
Wind Pressure Distribution on Rectangular Tall Buildings of Different Side Ratios <i>J.A. Amin and A.K. Ahuja</i>	143
Wind Pressure Distribution on Structurally Coupled Square Shape Buildings <i>S.K. Verma, A.K. Ahuja and A.D. Pandey</i>	151
Experimental Investigation of Wind Loads on Canopy-Roofs <i>A.K. Roy, A.K. Ahuja and V.K. Gupta</i>	157
Experimental Simulation of Wind Effect on 3-D Buildings Placed in Tandem and Staggered Arrangement <i>A.K. Das, P.P. Upadhyay and A.K. Ghosh</i>	165
Wind Tunnel Static Test on a Section Model of a Cable Stayed Bridge Deck <i>N. Lakshmanan, S. Selvi Rajan, S. Arunachalam and G. Ramesh Babu</i>	175

SESSION III

Wind Loads on Bridges and Computational Wind Engineering

Displacement – Dependent Wind Load Analysis of Self-Anchored Cable-Stayed and Bi-Stayed Bridges <i>Jatin A. Desai</i>	185
Large Eddy Simulation of High Reynolds Number Flow Past Two Square Cylinders in Side-By-Side Arrangement <i>M.B. Shyam Kumar and S. Vengadesan</i>	197
Numerical Simulation of Turbulent Flow Past a Conical Water Tank Structure <i>M. Jayakumar, Rajani, Sekhar Majumdar and K.M. Parammasivam</i>	205

CFD Prediction of Wind Pressures on Conical Tank	213
<i>T.A. Sundaravadivel, S.Nadaraja Pillai and K.M.Parammasivam</i>	

SESSION IV

Wind Loads on Bridges and Computational Wind Engineering

A Comparison between 'IS Code' Value and CFD Models for Predicting Coefficient of Pressure on Spherical Surface	223
<i>G.R. Vesmawala, H.S. Patil and J.A. Desai</i>	
The Impact of Proximity Surroundings on Wind Loading of High-Rise Buildings	233
<i>B. Venukumar, B. Srinivas, C. Cini and K. Suresh Kumar</i>	
Interference Effect between Two Square Buildings in Tandem Arrangement – Effect of Turbulence Intensity	241
<i>N. Lakshmanan, P. Harikrishna and Devdas Menon</i>	
Evaluation of Force Coefficients of 2-D Square Cylinder using Unsteady Non-Linear $k-\epsilon$ Model	251
<i>P. Harikrishna, N. Lakshmanan and Devdas Menon</i>	
Computer Program for Along - Wind Response of Tall Buildings	259
<i>Bodhisatta Hajra and P.N. Godbole</i>	

SESSION V

Field Testing and Evaluation

Random Wind Loading on Flat Plate Traffic Signs – A Field Approach in Natural Wind (FANW)	271
<i>S. Gomathinayagam, N. Lakshmanan, C.P. Vendhan and A. Abraham</i>	
Random Wind Loading on Structural Angles – A Field Approach in Natural Wind (FANW)	281
<i>S. Gomathinayagam, N. Lakshmanan, C.P. Vendhan and P. Harikrishna</i>	
Wind Loads on a 2-D Frame under Ambient Wind Conditions - A Rooftop Measurement	291
<i>A. Abraham, S. Gomathinayagam, P. Harikrishna and N. Lakshmanan</i>	
Comparison of Dynamic Lateral Design Forces by Analytical and Experimental Method	299
<i>Ajay Gairola, Monika Shrishrimal, Naveen Kwatra and Abhay Gupta</i>	
Development of Methodology for Remote Monitoring of Wind Sensitive Structures	309
<i>S. Sridhar, P. Sreeshylam, K. Balaji Rao, K. Ravisankar, S. Parivallal and K. Kesavan</i>	

SESSION VI

Wind Induced Damage and Analytical Studies

- Wind Induced Fatigue Damage in Lattice Steel Tower** 321
A. Rampal Darla and S. Talukdar
- Damage Analysis of Portal Frame using Stiffness Reduction** 329
S. Shifana Fatima, M. Revathy, C. Natarajan and A. Rajaraman
- Fragility Analysis of Cluster of Rural Houses for Cyclonic Wind** 337
Pradeep K. Goyal, T.K. Datta and V.K. Vijay
- Collapse of an Industrial Shed Under Wind Loads: Possible Causes and Remedial Measures – A Case Study** 345
Achal Kumar Mittal
- Structural use of Glass in High Rise Buildings** 355
Rajesh Deoliya and Navjeev Saxena
- Considerations of Aerodynamic Forces in Designing Guyed Towers in Cyclonic Wind Region** 367
R.K. Garg and Rajeev Goel
- Some Aspects in Estimation of Equivalent Static Wind Load on Tall Buildings** 373
Deepak Kumar, S. Mandal and V. Kumar
- Application of POD for Pressure Fluctuations on a Low-Rise Building** 381
N. Lakshmanan, S. Arunachalam, S. SelviRajan and G. Rameshbabu

SESSION VII

Wind Code Provisions and Standards

- The European Wind Loading Code: Background and Regulations** 391
Hans-Juergen Niemann
- Comparison of Various International Codes for Calculation of Wind Loads** 399
N. Venkatesh Sadish Kumar
- Assessment of Dynamic Wind Effect and Optimization of Shell for Tall NDCT using BS-4485 Code Approach** 405
G.R. Patil, M.K. Nema, A. Shrivastava and U.S.P. Verma
- Recent Trends in Sizing and Design of Reinforced Concrete Chimneys** 415
B. Venkateswarlu and A. Abraham

A Comparative Note on European and Swedish Standard for Wind Loads <i>Kamal Handa</i>	423
---	-----

SESSION VIII
Wind Energy and Wind Engineering Related Topics

Indian Wind Conditions and Design of Wind Turbines <i>M.P. Ramesh</i>	437
An Overview of Structural Design of Wind Turbine Towers <i>N. Lakshmanan, S. Gomathinayagam, P. Harikrishna and A. Abraham</i>	447
Experimental Studies on 400kv D/C Steel Mono Pole Tower Subjected to Wind Loads <i>N. Prasad Rao, S.J. Mohan, R.P. Rokade and R. Bala Gopal</i>	461
Use of EF Scale to Rate UM Tornado <i>J.S. Chahal</i>	471
Generalized Peak Factor and its Application to Stationary Random Processes in Wind Engineering Applications <i>S. Nadaraja Pillai and Y. Tamura</i>	477
Harmonic Analysis of a Multistorey Building for Wind Load Considering Infill Stiffness <i>Ajay K. Gupta and Mohankumar P. Hampali</i>	485
Author Index	495
